Subject: Engine Noise ??
To: ham-equip@ucsd.edu

I am using my Alinco DJ-180 in my 1994 Chevy pickup truck. Even though
the power comes from a stand alone battery, I am getting some noise into
the receiver. Also, at times I get noise in the AM receiver as well.
Any ideas?

Looking for the above, it'll need VOX.
Any opinions on the MFJ 624D ?

To: ham-equip@ucsd.edu

I'm looking to buy the noise immunizer accessory for the Hammarlund HQ-180. I've yet to see one of these accessories advertised in any vintage gear newsgroup/magazine that I subscribe/buy. Are these items rare? If any one has one of these items to sell please email me at my email address.

I have a HQ-145AC for sale. It's in very good condition mechanically, electrically and cosmetically. The rig was retubed within the last year. I'm asking US\$150.

Having been away from the hobby for some time I would like some information from anyone out there concerning ready made QRP CW transeivers. Single or multiple band. Does anyone still make such things? If so, how many different ones are available?

Thanks

Subject: motorola amp
To: ham-equip@ucsd.edu

Hello All,
Irecently purchased a moto. amp at a hamfest.
It doesn't work. I need the service manual.
Particulars:
Model # N1254A
SN 278AFC1287
freq range. 150.8 to 162.X MHz
7 watts in 60 watts out
I'll happily pay any copying/mailing costs

Thanks,
Dan

To: ham-equip@ucsd.edu

I am looking for the schematic for a LEADER LDM-853 digital multimeter. AND, as if that weren't enough, I am also looking for the schematic (preferably the

whole manual) for a WAVETEK 1002 sweep generator. :-)
If anyone has access to these documents, I will gladly cover any rela
Thanks

Subject: Wanted 220 crystal rigs?!?
To: ham-equip@ucsd.edu

Hi,

I am looking for 2 used 220 crystal rigs for use on
packet radio.. They don't have to be a lot of power 5 watts.
The two sites are less then 5 blocks away and it will be a
point to point node link.. If you have any please
let me know either via private e-mail or via packet.. or
my ll number. Thanks!

Those are additional DTMF tone-pairs. Some devices that use DTMF use
them to increase the available signal alphabet. (0-9, *, #, and
optionally A-D.) The Bell System defined these tones when they defined
the rest of DTMF but never used them on consumer telephone equipment.
